CONSULTIS
PROJECT SOLUTION SERVICES

At Consultis, we have more than **33 years of experience** creating dynamic, efficient IT workforce solutions that generate real results for your business.

Our Project Solution Services allows you to hire a team of technical talent for a specific project with critical deliverables. Solution delivery is at the core of every successful consulting project.

Problems We Solve

- ▲ Ensure the cost of the resources needed for a project are predictable when we are able to establish a bundled rate
- ▲ Enable the client to pay for the staffing of the project out of a different budget by writing an SOW instead of working through the HR/TA channels...and helps them avoid the “HR” vendor selection process
- ▲ Can elevate the level of expertise on the team by blending the resources
- ▲ Single point of contact: you don't have to work with multiple vendors for getting the expertise and resources that you need for this project

What We Do

We provide on-demand technical expertise for Statement of Work initiatives to offload the hiring of resources for specific initiatives or projects

We reduce pressure to provide costly benefits to retain full-time staff or over-tasking existing staff minimizing the loss of time and money

We support and help design your innovative and clear technical strategy for organizational growth

We provide the resources the organization needs to keep up with amplified digital expectations from customers

We provide an Engagement Manager to oversee project and resource success

Contact us to customize your project team that makes sense for you.
